

Two Sum - Code Solutions

```
// Brute Force Solution
var twoSum = function(arr, target) {
  for(let i=0; i< arr.length -1; i++) {
    for(let j = i+1; j < arr.length; j++) {
      let sum = arr[i] + arr[j]
      if(sum === target) return [i, j]
    }
  }
};

// Optimized Hash Map Solution
var twoSum = function(arr, target) {
  let n = arr.length
  let map = {}
  for(let i = 0; i < n; i++) {
    map[arr[i]] = i
  }
  for(let i = 0; i < n; i++) {
    let pair = target - arr[i]
    if(map[pair] !== undefined && map[pair] !== i) {
      return [i, map[pair]]
    }
  }
};
```
